As a passionate and goal-driven Application Development student at the Cape Peninsula University of Technology, I bring a solid foundation in programming, software development, and project management, paired with hands-on experience in customer engagement and administration.

During my academic career, I've developed strong skills in Java, HTML, CSS, JavaScript, Python, SQL, PostgreSQL, PHP, React, Flutter, API Design, Vue.js, Laravel and Spring Boot. My coursework has been supported by distinctions in Programming, Communication, and Project Management. I've also completed certifications through PMI and JASA, which have strengthened my knowledge of leadership, project management and entrepreneurship.

Beyond academics, I've gained valuable real-world experience through part-time roles at Tradeway and Les Femmes Wellness Centre. These roles enhanced my ability to work with clients, manage administrative duties, plan events, and support technical systems, skills that align closely with the needs of dynamic workplaces.

I am a quick learner, an enthusiastic collaborator, and someone who thrives under pressure. My blend of technical ability, people skills, and adaptability makes me confident in my ability to contribute meaningfully to your team.

I would be grateful for the opportunity to further discuss how my background can add value to your company. Thank you for considering my application.

Warm regards,

Laeeqah Arendse
